

Live Greener & Recycle Smarter

Troy Township has partnered with Will County to bring you this 3-part seminar on "Live Greener & Recycle Smarter"

Home Energy Efficiency & EVs Thursday, April 20th at 6:00pm

Keeping your home comfortable in cold or hot conditions, running appliances, using lights, even playing games all use energy. Everyone benefits when making better choices in their homes and in the vehicles they drive. Learn about ways to make your home more comfortable while reducing your utility bills and how to add an EV or Plug-In hybrid to your life.

Greening your life/Composting outside & inside. Thursday, July 20th at 6:00pm

Every day we make choices from where to shop to what we buy and how we use what we have. Often we could make more environmentally beneficial choices while still meeting our needs and extravagant desires. Learn some tips for better buying, using and recycling or composting with an emphasis on how to start composting food scraps.

Traditional, Paint, Batteries & Household Hazardous Material Recycling Thursday, Sept. 7th at 6:00pm

Recycling infrastructure has been growing but not everything that is recyclable can be taken in the curbside bin. Let's sort out what goes where and why, along with how to handle the dangerous and toxic items in our homes. We can make our homes safer and be sure our "wish cycling" results in real recycling.

All presentations will be held at:

Troy Township

25448 Seil Road, Shorewood
